

Energy Management, Monitoring And Targeting

Efficient Power Solutions delivers turnkey solutions for energy efficiency to industry and the built environment.

Effective energy monitoring and management can unlock instant fuel savings and identify areas for upgrade and maintenance.

Efficient Power Solutions provides monitoring and targeting services to help customers to interpret the raw data collected from energy meters on gas, electricity, water, external temperature and CO2 emissions. And our dedicated in-house team can even be your remote energy management bureau.

The most effective route towards significant carbon savings is to make the most of your raw data in order to manage energy consumption cleverly. We'll use our expertise to help you to make important, on-going energy savings – not just today, but on a continuing basis.

What to expect from our energy management, monitoring and targeting services:

- Support 364 days of the year
- Out-of-hours support
- 99% of calls from building operators resolved over the telephone

Our services Include:

- Real-time, raw energy data available
- Year-on-year or cross-site comparisons
- Easy-to-understand reports in a range of formats
- Flexibility to enter tariffs and additional information
- Round-the-clock access to specialist expertise from our team

Our Services:

- **Turnkey Installation Services**
- **Service, Maintenance and Bureau**
- **Energy Management, Monitoring and Targeting**
